Ohio (February 2007)—The Ohio Digital Classroom now provides Ohio educators *Teachers' Domain*, an online, media-on-demand resource library that offers innovative methods to help keep students engaged and interested in civil rights, engineering, physical science, life science, and earth and space science.

The Ohio Digital Classroom is a FREE access point to the *Teachers' Domain* Collections. These are FREE online resources that provide multimedia learning tools and corresponding lesson plans from *NOVA* and other award-winning PBS programs and educational organizations around the country.

*Teachers' Domain* is a nationally distributed resource from the Ohio Digital Classroom's partners, PBS WGBH in Boston and the Corporation for Public Broadcasting (CPB).

Currently containing more than 1,000 resources, the collections are constantly adding new material, most recently enhancing the engineering selections. For k-12 teachers, science concepts covered include structure and function, behavior and regulation, genetics, ecosystems, and motion and forces, among others. All course content corresponds to state, national and MCREL education standards.

## **About the Ohio Digital Classroom**

The Ohio Digital Classroom is a statewide source for rich media content correlated to Ohio standards. Its purpose is to promote the educational use of digital content and delivery in Ohio schools.

Provided through a consortium of Ohio's Public Television stations and educational Technology agencies, offerings such as *Teachers' Domain*, *PowerMediaPlus* and *Chalkwaves Ohio* bring an array of easily accessible media to educators' and students' fingertips.

For more than 50 years, Ohio's PBS stations and Ed Tech agencies have been providing educational media, original Ohio media content, and instructional technology services to Ohio's educators. The ODC is a joint effort to extend the PBS/Ed Tech educational mission.
